Waterborne Sealers and Finishes
AmberSeal is a poly-toned, waterborne sanding sealer specially formulated for use with all Bona waterborne finishes. AmberSeal combines the color and depth of oil-based products with the low VOC's and safety of waterborne sealers. It has excellent abradability, fast dry times and reduces the potential for sidebonding and tannin bleed.

• Bona ClassicSeal (formerly Bonaseal)

Bona ClassicSeal (formerly Bonaseal) wood floor sealer is specially formulated for use with Bona Naturale, Bona Traffic, Bona Mega, and Bona Mega Clear HD finishes. Bonaseal seals the wood, minimizes grain raise, provides a build layer, and prevents the finish from penetrating into the wood surface.

• Bona Mega Booster

Bona Mega Booster is the newest innovation to the Bona waterborne finish family. This performance enhancing additive for Bona Mega promotes increased durability, chemical resistance and adhesion. Combined with Bona Mega, it is ideal for prolonging the life and enhancing the beauty of residential and commercial wood floors. GREENGUARD certified for indoor air quality.

• Bona Mega Clear HD

Takes Bona Mega to the next level with the addition of a second component and the elimination of the amber tint combine to increase the physical performance and provide a new look to the Bona Mega® family. These new options allow the floor owner and contractor to meet various performance and appearance demands at an incredible value.
